## **Fishmaster Introduces the First Universal T-Top for Center Console Boats that Folds Down for Fixed Bridges or Storage**

Fishmaster has introduced the first affordable and universal T-Top that folds down for fixed bridges or storage. The Fishmaster T-Top is made entirely from 1-7/8" diameter polished and anodized aluminum tubing making it one of the strongest and stiffest T-Tops manufactured today. The innovative patent pending design allows it to mount to virtually any center console boat and fold down below the console in minutes. Rod holders, electronics box, antenna mounts and many other accessories are also available.

Fishmaster T-Tops are offered factory direct and through domestic boat dealers and international marine distributors. For additional information visit [www.Fishmaster.com](http://www.Fishmaster.com) or call **877-777-8693**.
